
Title: The Black Necklace IV

Author: Trebr Drab

Didn't Malabelle also have a "black necklace", and didn't she have it taken from her by Minax on the streets of Trinsic in plain view? Wasn't that necklace an all black one, instead of the gold with black center? Perhaps someone can help out here.

As things stand at this point, the necklace has resurfaced along with it's command of undead, and then the story ends and we have heard no more about it at that point. Nothing again until Minax returns yet again, in the more recent events, with more undead.

However, there is other news that may relate to all the doings. Blackthorn had joined Exodus and become a pawn of evil. It struck me hard that the events dealing with Exodus and Blackthorn brought us a strange mixture of a being, part man and part machine. This discovery is a fearful thought when one notes that the Relics of Mondain consisted of a few body parts that in themselves seem useless as any form of undead, being what little they are. But they could be made usefull with the new knowledge our enemies gained in Blackthorns

research, and knowing
that Mondain's brain is a
part of those relics
sends a cold shiver down
my own spine.

Recent events show us
plenty of undead, and the
Commander of the Royal
Guard stricken with some
poison, and a strange man
appears, by the name of
Odric. This man makes a
trade, he will cure the
Commander if the Royal
Guard will return a family
heirloom, taken by Minax.

Of course, Minax will
waste her time on cheap
baubles, eh? Who, then is
this man, Odric? By most
accounts he is crude and
seems to almost hold the
Commander in contempt.
But it's hard to get a
reading on this aspect.

Of course, Minax will
waste her time on cheap
baubles, eh? Who, then is
this man, Odric? By most
accounts he is crude and
seems to almost hold the
Commander in contempt.
But it's hard to get a
reading on this aspect.

What we do know is
that, when Minax was
confronted wearing the
necklace called "Mondain's
Embrace", a gold necklace
with a black center, it
was Odric who somehow
forced Keeonean to
snatch it from Minax's
neck and give to Odric. A
strange turn of events,
to end this legacy of the
necklace. But is it gone
forever? Is it's primary
use already fulfilled?
Most of all, one must

ask, why would this
neclace be given such a
name?

And the age old question
haunts us still since the
dawn of the first age....

...is Mondain alive
